

# DOPAR ENERGY

Heart of Every Great Powertrain

# About Us

DOPAR Energy is a hardware product manufacturing company, founded in the year 2020. We specialize in the engineering and development of high-efficient BLDC motor controllers for electric vehicles (EV) with cutting-edge features like tuning of performance parameters like acceleration and speed according to the vehicle dynamics, auto-phase detection, adjustable speed limit, etc . Our products range from 250 watts up to 1.5-kilowatts. All our products are designed and crafted in India and come with the proud **“MADE IN INDIA”** seal!

# Vision Mission

## Vision

Become a leading e-powertrain technology company, which leads technology with sustainability.

## Mission

- Always Innovate e-powertrain technology.
- Prioritize client satisfaction.
- Localize the e-powertrain components, Crafted in India for the World.
- Passion for work and never give up.

# Our Team

Ganesh Shelke  
(Founder and CEO)

Hrushabh Jadhav  
(Co-founder and CTO)

Vaibhav Karad  
(Co-founder, Sales and Marketing Head)

Gitesh Mali  
(Co-founder and Production Head)

# Our Products

## BLDC Motor Controller's

For E-CYCLE  
250W/350W

For E-BIKE  
500W/800W/1000W

For E-Rickshaw  
1000W/1200W/1500W

# Features

- 1 Wide input range for voltage selection
- 2 Self learning technique ( Auto-phase)
- 3 Temperature based safety (De-rating)
- 4 Vehicle performance parameter tuning
- 5 Customization as per requirement

# THANK YOU
